

For maximum requirements: S 7000 *Prefino*

There are tasks that only specialists can handle. Furnishing changing rooms, for example. Where the crucial bit of extra space, functionality, and design is needed - that's where Prefino comes into play:

- **Extra-large locker capacity**
for more storage space
- **Special interior fittings**
for practical and orderly lockers
- **Absolutely sanitary**
thanks to smooth interior walls and bases
- **Optimum use of space and interior design**
thanks to versatility and reconfiguration options
- **Double-walled design**
for interior lighting, safe and clean online locking systems, and much more

Steel

Stainless steel

HPL decor

The durable system body made of steel (alternatively stainless steel or aluminum) is the ideal basis for creative door variants in different materials.

For additional details, please see the Prefino product series brochure.

Real-wood veneer

Glass with printed motifs

HPL with vectogram

Prefino offers countless customization options.

We look forward to your project-specific inquiry and will gladly provide you with an offer tailored to your specific needs.

Have a seat!

Depending on a building's design, a variety of different sub-frames can be utilized with locker systems. Prefino is flexible - and therefore well equipped for any challenge.

In addition to the classic foot and base designs, integrated bench solutions are becoming more and more commonplace. Be it overhanging benches on an existing base, benches built in front with shorter doors, or benches with storage boxes underneath: Prefino is the best choice for an ideal outcome.

All of the sub-frames shown here are very easy to clean, in part thanks to the clear-cut corner solutions. For you, this means extraordinarily sanitary conditions and simple, fast, and therefore cost-effective cleaning. Furthermore, the option with storage boxes underneath offers additional space that has generally gone unused - a true added benefit for visitors.

We look forward to your project-specific inquiry.

Bench with storage box underneath:

The bench surface serves as a lid that can be opened only by the user of the locker. It ensures that bags, helmets, and other items can be stored comfortably and removed easily.

A clean solution.

In areas with high hygiene requirements (such as the food industry), locker systems have to meet special demands. The connection to existing ventilation and extraction systems also requires a professional solution.

Benches in front with HPL seat: This version as well as the variant with storage box underneath can also be retrofitted on request.

Swing-over bench
This bench serves as the transition from the contaminated area to the clean space. Street shoes remain on the contaminated side.

In addition, this also requires suitable supplementary products, such as swing-over benches, over which employees move from the "contaminated area" to the "clean area". C+P offers the perfect range for these furnishing tasks.

The highlight: S 7000 *Prefino*

Sanitary and easy to clean

Thanks to the smooth interior walls and bases, "dirty corners" are a concept unknown to Prefino. The double walls offer a safe installation space for interior lighting, online locking systems, ventilation and extraction systems, and much more - a novelty on the market!

Smooth interior walls - and endless possibilities behind them

The Prefino ventilation concept

Drying and ventilation play a major role in locker design. In Prefino lockers, the optimized air flow design allows clothing to dry much faster than in conventional lockers. It offers options ranging from the effective self-drying concept (SVL) all the way to forced ventilation with an integrated dryer. (See illustration)

The allrounder for special furnishing needs.

Steel doors: Double-walled and insulated, 19 mm thick, offers unlimited color coating options.

HPL doors: Made of high-pressure laminate, 13 mm thick and available in a variety of appealing decors.

Glass doors: Made of colored, enameled safety glass, 8 mm thick, for a particularly classy design.

Labeling and orientation: Customized numbering and pictograms (monitors integrated in the glass or mirror panel on request).

Lockers

Lockers 466

Double-tier lockers 468

Assembled box lockers 470

Z lockers Business Class 478

Glass shelves: Made of safety glass, 8 mm thick, as an elegant and stylish solution for the interior.

Monitor and LED lighting: Can be integrated behind the attractive mirror panels.

All common mechanical and electronic locking systems can be integrated in Prefino: From turning bolt latches to coin-operated locks to electronic online locking systems with central display, which also provides information about the free and occupied lockers.

S 7000 Prefino

The S 7000 Prefino series offers more:

- Durable sheet steel construction with multi-functional modular system and overlapping doors
- **Spacious body height of 1850 mm (1950 mm incl. feet or base)**
- **Body and steel doors electrolytically zinc-plated as a standard**
- Fronts made of steel, optionally HPL with wood decor or enameled glass for an even more attractive appearance
- Double-walled design for high stability
- **Smooth interior walls - sanitary and easy to clean**
- Compartment sizes can also be retrofitted later
- Door opening limiter 90° and doorstop silencers for outstanding closing characteristics as standard fittings
- Cylinder lock with 2 keys
- **Novel slanted roof (optional)**
- Perforated hat shelf for improved ventilation
- Coat rail with 4 double coat hooks and different positioning options for optimum adaptation to user behavior
- Wide variety of interior fitting solutions for any requirement
- Sub-frame alternatively with feet, base, spacious storage box, or bench
- Optimum ventilation, alternatively through SVL (self-ventilation), FVL (forced ventilation), or FVLD concept (forced ventilation with dryer)
- Glass doors always supplied in disassembled state for safe transportation

Business Class Z lockers offer you more:

- Optimum use of the interior space for 2 users, with low floor-space requirements
- **Lots of storage space!** Large, bulky bags or helmets, long garments, shoes, and small objects all have their place
- Excellent view of locker content thanks to the **functional interior arrangement**
- **No troublesome door projections** like in conventional Z lockers, meaning there is no risk of injury
- **All users have compartments of exactly the same size**
- **Uniform appearance** with a harmonious mix of small and large doors that fits well into any room

4 x order no. 46226-20

Mirror panels

Prefino offers a range of different end face plates to enhance both the function and the appearance of the ends of locker rows, which often go unused.

The panels with integrated mirrors with or without deposit areas, with sockets or lighting, allow for customized options for this space.

They can either be attached to lockers or simply to the walls of a room.

C End face plate
to be attached to the side of the locker row, **for locker depths of 500 mm**
For additional mirror panel options, please submit a project-specific inquiry.
