

maine

storage & filing

Maine is a UK manufacturer of prestigious filing & storage systems for the work environment. Maine is owned by MKP, an established precision engineering component manufacturing company in Milton Keynes, with a reputation for innovation and excellence in the highly competitive and rigorous automotive industry. In 2012 MKP were awarded the prestigious General Motors Supplier Quality Excellence Award which puts them in the top 5% of all General Motors Europe suppliers and the top 7% worldwide. MKP are also major suppliers to Bentley and Aston Martin.

Maine design and manufacture steel storage systems to the highest possible quality. Their ranges include the classic Maineseries31 range, which has a wide variety of widths, heights and internal configurations to satisfy all office storage requirements.

Their Mainepure range has the flexibility of Maineseries31 but with a more contemporary feel, with an elegant façade and simple but unique door handle which also acts as a label holder.

The latest addition to Maine's ranges is a departure from the style and design of conventional filing storage systems. The new Maineslim range has the strength of traditional steel storage but a modern aesthetic with a very slim frame and the handle detail of the mainepure range.

Their standard range which suits most requirements is their Mainestream range of lateral files, cupboards and tambours. This is a modular range which can be mixed and matched to create a clean line of units in the workplace.

All Maine's units can be finished in any colour including standard ranges of BS, RAL, Pantone, Dulux Colour dimensions and specialised paint finishes.

our range of designer lockers have strength & style

individual locks, electronic or coded

contemporary aesthetic with a clean & elegant façade
