LOKSA™ was created from high quality 0.8 mm thick powder painted steel coated in RAL colours. Each module is equipped with system ventilation, a storage system (in lockers type A and B - rail with hooks, in modules C and D - hooks) and adjustable feet in the plinth. If you wish to create modules from more lockers, thanks to the mounting holes in the bodies, the assembly system is fast and intuitive. The choice of materials and care for every small detail makes the LOKSA™ collection unique among steel furniture.

Lockers from the LOKSA™ collection allow for any arrangement in any interior. Doors 30 cm or 40 cm wide, lockers on a plinth or a bench, choice locks (both mechanical: key / padlock or electronic: code / RFID). Besides, you can personalize your lockers with numbering or combinations of two or more door colours.

ENDLESS POSSIBILITIES AND HIGHEST QUALITY.
LOKSA™ LINE WILL SURPRISE YOU.

WE MANUFACTURE
AND DESIGN IN POLAND.
WE WORK FOR CUSTOMERS
GLOBALLY.
